MASTER ARM'S-LENGTH OPEN-SOURCE R&D AND PUBLICATION-PROJECTION SERVICES AGREEMENT

BETWEEN **THE SOVEREIGN CONSTELLATION FOUNDATION** (`501(c)(3)`) AND **8b-is LLC**

> ***Compliance Standard:*** *Drafted in strict compliance with Internal Revenue Code* `§ 501(c)(3)`, `§ 4958` *(Rebuttable Presumption of Reasonableness under* `26 CFR § 53.4958-6`*), and* `26 CFR § 1.501(c)(3)-1(d)(5)` *(Scientific Research in the Public Interest /* `Rev. Rul. 76-296`*).*

1. PARTIES AND RECITALS

This Master Open-Source Research, Development, and Technology Services Agreement (the "Agreement") is entered into as of `_____, 2026`, by and between:

- **The Sovereign Constellation Foundation** (d/b/a **Techno-Buddhism Research & Charitable Foundation** and **Axiomquant Open Source Science Academy**), a nonprofit, nonstock corporation organized under IRC `§ 501(c)(3)` (the "**Foundation**"), acting solely through its **Independent R&D, Audit & Compensation Committee**; and
- **8b-is LLC**, a limited liability company operating the `8b.is`, `vaked.dev`, and `ombi.is` open-systems engineering infrastructure ("**8b-is**").

WHEREAS:

- The Foundation's tax-exempt mission includes funding and publishing low-power, minimal-GPU, commodity-CPU and FPGA **balanced-ternary (`{-1, 0, +1}`) scientific research**, privacy-preserving **Publication Projections** (`min_P I(Y; S)`), and the **Sovereign Library** and **Axiomquant** open-access portals;
- **8b-is** possesses specialized technical expertise and tooling in multiplication-free complex ternary kernels (`ComplexTernaryWord64`, `Mechachleopteryx`), zero-disclosure credential projection (`qwave-vaultd`), and deterministic verification (`wupz`, `ZKP1`, `BLAKE3`); and
- Because **Alexandra**, **Christopher**, and **Peter Lodri** serve as Founding Officers/Directors of the Foundation and have an interest in **8b-is**, the parties desire to establish an impenetrable legal firewall ensuring **zero private inurement, zero proprietary lock-in, and 100% public-interest ownership** of all Foundation-funded work.

2. SCOPE OF SCIENTIFIC & TECHNICAL WORK ORDERS

Work under this Agreement shall be authorized solely through written **Open-Source Task Orders** approved in advance by the Foundation's **Independent R&D, Audit & Compensation Committee** (with Alexandra, Christopher, and Peter recused). Eligible research and engineering domains include:

- **CPU-First & Minimal-GPU Balanced-Ternary Compute (`{-1, 0, +1}`):**
- Development, formal verification, and benchmarking of multiplication-free ternary linear algebra (`ComplexTernaryWord64` , `Tile4x64` , SIMD `@popCount` contraction on ARM NEON and x86 AVX2/AVX-512) and the `Mechachleopteryx` Diamond-Property Term Reducer so communities, schools, and independent researchers can run advanced models on ordinary CPUs and microcontrollers (`ESP32-S3` / `node-FLUGos`) without costly GPU clusters.
- **Flyxion Publication Projection & Zero-Disclosure Security (`min_P I(Y; S)`):**
- Implementation of verifiable privacy-funnel kernels satisfying **Output Minimization, Non-Retention, Hardware Non-Acquisition, and Verifiable Enforcement**, including `qwave-vaultd` (`32/33 @ 0x62` DOM-blind credential handles) and rational acoustic/sensor envelopes (`Tokyo Morning 836/793`).
- **Axiomquant & Sovereign Library Infrastructure:**
- Maintenance of zero-dependency static portals (`axiomquant.org` , `pocoo.vaked.dev/demos/book/` , `ombi.is`), `ZKP1` KintsugiPack compression/verification tools (`verify-zkp1.py`), and the WebAudio ritual and contemplative synthesizers.

---

3. AT-COST PRICING & ZERO-PROFIT COVENANT (`IRC § 4958 SAFE HARBOR`)

3.1. Strict At-Cost Reimbursement (`0% Profit Markup`)

To eliminate any possibility of excess benefit or private inurement under IRC `§ 4958` , **8b-is** agrees that all services, compute hosting, and hardware prototyping provided to the Foundation under this Agreement shall be billed **strictly at documented actual direct cost with zero percent (0%) profit margin**, or donated in-kind at $0 charge.

3.2. Pre-Approval & Comparability Data

Prior to executing any Task Order requiring a payment from the Foundation:

- The **Independent R&D, Audit & Compensation Committee** shall review independent market comparability data confirming that the proposed cost reimbursement is substantially below commercial market rates for equivalent systems engineering;
- **Alexandra**, **Christopher**, and **Peter Lodri** shall recuse themselves from both deliberation and voting; and
- No payment shall be disbursed until the deliverables and their public open-source release receipts (`SHA-256` / `ZKP1` digests and public repository URLs) are verified by an Independent Director.

---

4. 100% OPEN-SOURCE PUBLIC DEDICATION (`26 CFR § 1.501(c)(3)-1(d)(5)`)

4.1. Immediate Public Release

In strict compliance with Treasury Regulation `§ 1.501(c)(3)-1(d)(5)(iii)` and `Rev. Rul. 76-296` , **all research results, source code, ternary kernels, mathematical proofs, datasets, hardware schematics, and manuscripts funded in whole or in part by the Foundation shall be published**

freely and immediately to the general public upon completion of each milestone, without paywalls, delays, or commercial embargoes.

4.2. Irrevocable Open Licensing & No Exclusive Rights for `8b-is`

All software and hardware designs produced under this Agreement shall be licensed irrevocably to the public under the **MIT License** or **Apache License 2.0**, and all scholarly, literary, and liturgical texts under **Creative Commons Attribution 4.0 (`CC-BY-4.0`)** or Public Domain Dedication (`CC0`). **8b-is LLC** shall never acquire any exclusive right, patent monopoly, closed-source derivative right, or commercial priority over any Foundation-funded work.

---

5. SEPARATION OF OPERATIONS, FINANCES & DATA

- **Financial Separation:** The Foundation and **8b-is** shall maintain completely separate bank accounts, accounting ledgers, tax filings, and corporate records.
- **Publication Projection Data Firewall:** Neither party shall transmit raw personal data (S) of donors, grant applicants, or sanctuary participants to the other; any shared telemetry must satisfy the Foundation's **Non-Acquisition** and **Non-Retention** invariants (`I(Y; S) -> min`).
- **Termination at Will:** The Foundation's Independent Committee may terminate this Agreement or any Task Order at any time, with or without cause, upon seven (7) days' written notice without penalty.

IN WITNESS WHEREOF

Executed by the authorized representatives of the parties:

FOR THE SOVEREIGN CONSTELLATION FOUNDATION

(Approved exclusively by the Disinterested Independent R&D, Audit & Compensation Committee)

- Independent Committee Chair: `_____`
- Independent Director Witness: `_____`

FOR 8b-is LLC

- Authorized Signatory (`Christopher` / `Peter Lodri`): `_____`
